

With a new unlimited Telstra Internet Direct connection, your business will take off!

### Benefits of Telstra Internet Direct

- Minimal 'hops' – all capital city access points are directly connected to the core network ensuring a maximum of two hops from Telstra's Internet backbone;
- Packet transit delay times – low latency and minimal congestion over the Australian backbone.
- Telstra Internet Direct offers a wide range of carriage service types, speeds, usage and pricing options, as well as the option of IPv6 addressing.
- In-built security measures help to keep communications safe, while the extensive coverage and exceptional performance help customers avoid congestion and configuration issues. Telstra Internet Direct is easy to manage and scalable and online management and reporting tools help you analyse and predict future requirements.
- Telstra Internet Direct is the solution when you need high-speed data access and dedicated Internet connectivity for business applications such as e-commerce, onsite web-content server, mission-critical web access, email, streaming, using a Business Local Area Network, Corporate Wide Area Network, Onsite mail server or Onsite Internet VPN gateway.

### New Telstra Internet Direct Pricing- Single Uplink

**50Mbps Unlimited @ \$850 per month - ex-GST**

**100Mbps Unlimited @ \$1100 per month - ex-GST**

**200Mbps Unlimited @ \$2700 per month - ex-GST**

**400Mbps Unlimited @ \$4688 per month - ex-GST**

For these amazing prices you get a carrier-grade, dedicated connection to the Internet swiftly, securely, with reliable performance and without network congestion, founded on Telstra's national Australian Internet backbone.

The faster speeds will help make your staff far more productive and the capped pricing gives you protection against bill shock.
