

Fixed domes for any environment with remote focus and zoom

- High-performance video including HDTV quality
- Multiple H.264 video streams
- Easy installation with remote focus and zoom
- Outdoor-ready models designed for extreme temperatures
- Power over Ethernet
- High-performance fixed domes.

AXIS P33 Network Cameras consist of two types of models; AXIS P33 Series and AXIS P3301/P3304/-V Network Cameras.

AXIS P33 Series: full-featured indoor and outdoor-ready fixed domes designed for efficient installation. AXIS P33 Series is available in 3 versions: indoor, indoor vandal-resistant and outdoor-ready vandal-resistant.

AXIS P3301/P3304/-V: smaller, discreet, indoor fixed domes with a subset of the features of AXIS P33 Series. AXIS P3301/04/-V are available in indoor and indoor vandal-resistant versions.

Protective casings for exposed indoor and outdoor areas

The protective casings and not so prominent design make fixed dome cameras ideal for video surveillance in exposed areas such as airports, subways, retail stores, schools and university campuses.
