

The Revolution ECO 28 from PC Locs features an open design to allow passive ventilation and quick and easy visual checks by teachers.

The laptops are accessible from both sides of the cart for faster loading and unloading of the laptops than with a conventional front-loading mobile cabinet.

#### **Flexible laptop storage**

The Revolution ECO 28 has an adjustable laptop shelf which makes it suitable to store up to 28 notebooks or netbooks of almost any size.

#### **Smart charging**

The charging is managed by the remote-controlled ECO Safe Charge™ power management system.

This intelligent system stages the availability of power to each laptop bank. The functions available can help prevent power overloading, reduce energy bills, reduce carbon emissions and extend the life of your laptop's batteries.

The high level of security built into the cart and the anti-theft lock down kit, protect not only the laptops inside but also the cart itself.
