

ePrinting Convenience with HP

Here's a cool new printer from HP that's all about convenience and office productivity.

At just \$1299 RRP, the HP M570dw is so inexpensive you can justify deploying fully-featured printers in more convenient office locations.

Saving three staff members five minutes a day from distracting and wasteful walks to and from the main printer can pay for this printer in under a year.

HP ePrint & Wireless Direct means you can print from just about anywhere at any time, so those pesky Mobile and Remote workers don't have to hog the printer when they visit the office hub.

A **50-sheet document feeder** and **Digital Filing** lets you scan hard copies to digital files 'stat' and save them direct to email, network folder, cloud or USB.

It's no slouch on speed – print documents at up to **31 pages per minute**.

With **HP Auto-On/Auto-Off** – your enviro-footprint will go down a size and with two-sided printing, you'll save on paper. Most important, with high-impact colour you'll make better office documents.

Consumable-wise, you'll get better value with optional **high-capacity cartridges** and you can **recycle original HP LaserJet toner cartridges** through HP Planet Partners.

Call Evotec IT on 1300 133 966 for advice on your office productivity.
