

Telstra's FaxStream® Enhanced is a range of products and services which can improve the performance of your fax machine and messaging.

The FaxStream Enhanced range includes:

- Worldwide Integrated Fax and Email Distribution
- Outbound Faxing
  - Broadcast lets you send a single message to multiple fax and email destinations at the timing of your choice, helping to save you valuable time. Use your Web browser to easily manage your broadcast lists and send your broadcasts.
  - eMail to Fax lets you send faxes from your email client
- Mail Box Services
  - Never Busy Fax will receive and send your faxes to an email address or a fax machine when your machine is busy or out of paper.
  - FaxBank will receive your commercially sensitive faxes, when confidentiality and security are important.

With FaxBank you can receive fax messages by email without the expense of additional fax machines.

### Never Busy Fax

Never Busy Fax means that your customers and suppliers contact you and this means that you should never on an incoming fax message. If your fax machine is often busy, out of paper or otherwise non-contactable, then this Telstra service may be suitable for you. Messages not retrieved from the mailbox will be deleted three months from the date of receipt.

### FaxBank

FaxBank provides you with a virtual fax number that is used as the answering point for all faxes. All incoming faxes are received by FaxStream Enhanced, converted to soft copy and forwarded to your nominated email address as a TIFF file attachment.

This is an ideal solution to ensure no faxes are lost and delivery is secure to your email inbox only. FaxBank will receive your commercially sensitive faxes, confidentiality and security are important. With FaxBank you can receive fax messages by email without the expense of additional fax machines.
